description

These devices contain two independent 4-input expanders. The '60 perform the Boolean function $X = ABCD$ when connected to X and $\overline{X}$ inputs of SN5423/SN7423, SN5450/SN7450, or SN5453/SN7453. The 'H60 performs the same function when connected to X and $\overline{X}$ inputs of SN54H50/SN74H50, SN54H53/SN74H53, or SN54H55/SN74H55.

The SN5460 and SN54H60 are characterized for operation over the full military temperature range of −55°C to 125°C. The SN7460 and SN74H60 are characterized for operation from 0°C to 70°C.
